

Bioplastic Sushi Trays

Made from Ingeo™ – a NatureWorks® biopolymer

Sturdy black sushi trays with clear lids are made from Ingeo™, a renewable, plant-based biopolymer. Providing an alternative to the standard petroleum based containers so often used by sushi chefs at sushi bars, delicatessens, supermarkets, grocery stores, cafeterias, and restaurants.

These trays look, feel and function the same as the plastic variety, without the damaging environmental impact. While the crystal clear lids shows off the freshness and skill that goes into sushi making.

- **Crystal-clear lids for maximum food visibility.**
- **Made from a “natural plastic” that performs as well as petroleum-based products.**
- **Produced with sustainable, annually renewable resources.**
- **Meets FDA guidelines for food contact surfaces.**
