

Bridge-Gate™

Wheat-straw pulp Plates and Bowls

Bridge-Gate wheat-straw pulp plates and bowls are made from organic, waste fibers from harvested wheat. Even more unique is the patented zero-pollution Biopulping process used to manufacture them. This process is fully self-contained and utilizes a water-saving washing system to conserve energy and water in order to produce a chemical-free product that meets or exceeds industry standards for compostability.

With Bridge-Gate you can be assured of a compostable, consistently high-quality product that has been produced to minimize ecological impacts from field to factory to foodservice.

- **Heavy duty**
- **Oil and grease resistant**
- **Great for hot or cold foods**
- **FDA approved for food use**
- **BPI certified compostable**

Bridge-Gate hinged containers and takeout containers are also available.
