

Greenware® Cup Inserts

Made from Ingeo™

These simple little 4-oz cup inserts transform a regular cup into a versatile food packaging carry-all.

The inserts are designed to work with multiple cup sizes and lid styles. They can be flush-filled and covered with a flat lid, or over filled and covered with a dome lid to create a two compartment container. Or by utilizing both lids the package is easily converted into a three compartment container. The versatility allows for endless menu options for today's fast-paced, grab-and-go customers.

Flexibility that fits your operation

- One cup insert fits with multiple Greenware cup and lid sizes.
- Simply add on to products that are already in your inventory.

Creativity that attracts customers

- Custom notch design allows for easy insert removal.
- Attractive packaging for an eye-catching food presentation.

Made from Ingeo biopolymer (PLA), Greenware products are annually renewable, certified compostable, and made entirely from plants not petroleum.

TURN A CUP
INTO A CARRY-ALL

The combinations are endless!
