

World Centric® Kraft Hot Cups

With Ingeo lining

World Centric Kraft Hot Cups are made of three layers, a brown kraft paper on the outside, white paper on the inside and an Ingeo™ lining. The 2-ply paper offers greater insulation than a standard disposable hot cup and generally eliminates the need for a coffee sleeve. The Ingeo moisture-proof lining offers further heat resistance and is plant based. Making these cups 100% compostable in a municipal or commercial compost environment. Matching Ingeo Compostable lids are also available.

- **Elemental Chlorine-free**
- **BPI certified compostable**
- **Made from renewable plant-based resources**
- **Ingeo lining is derived from corn grown in the USA**
