

Dinnerware from fallen leaves.

**Impressively Versatile,  
Stylishly Sustainable.**

The chic, all-natural choice for party-ready single-use dinnerware. Delivering compostable convenience for every occasion.

Verterra production starts with collecting fallen leaves from plantations precluding them from being burned and polluting the air. The leaves are then brought to the factory, prayed with high-pressure water, steamed and UV sterilized. Over 80% of the water used is recaptured and reused, and the entire manufacturing process uses just 10% of the energy used in recycling.

-  Elegant, stylish and unique.
-  Sustainable. Made from fallen leaves - no plants or trees cut down.
-  All- Natural. No glues, bonding agents, chemicals, plastics, waxes, toxins.
-  BPI-certified compostable.
-  Versatile. Oven, microwave and refrigerator safe.
