

ecotainer® Cold Cups

Earth friendly ecotainer cold cups are made from environmentally responsible, annually renewable resources. They look, feel and preform just like traditional cold cups. However unlike traditional cold cups that use a petroleum-based plastic lining, these cups have a plant based lining made from Ingeo (PLA). This means they are not only recyclable, but can also be composted in a municipal or commercial composting facility. Additionally the paperboard used is sourced only from sustainable managed forests. Making them an excellent alternative to traditional cold cups.

- **Attractive leaf-motif design**
- **For cold food applications only**
- **Moisture-proof Ingeo™ lining made from plants**
- **BPI and ASTM D6868 certified compostable**

| Item # | Description | Inner Pack | Case Pack |
|-----------|---------------------------------------|------------|-----------|
